NOTICE From Student Hostels Committee

Result on Hostel Point System Review 2026/27

Students' opinions were collected by the student representatives after the hostel point system review announced in November last year. After verifying students' opinions and reviews made by the task group, it was decided to follow the same principles as listed below and adopt the students' opinions we have collected to update the point on residential area. In addition, the point on student activity has also been updated. All updates have been approved by the Student Hostels Committee. The updated point on residential area for 2026/27, together with the point on home type and student activity are listed in the appendix as reference. [If there is any new information on transportation and routes, please send us in the review exercise to be held in next academic year \(November 2026\).](#) Thank you!

1. Reference route : basically the fastest route recommended by Google Maps will be chosen as reference, if there are more than one routes with similar travelling times, the route taken by most residents will be chosen;
2. Points : it would be calculated by dividing the number of minutes needed for transportation by three (except those for the Islands and overseas districts);
3. Individual differences : point on residential area applies to all the applicants who live in the same district. Individual differences in the walking time or other special circumstances could be stated in the application for Personal Reason Special Selection.
